

We are... **FITZROY**

A team of passionate individuals, who are here to help you with your journey to the cloud.

- ✓ **Consulting** – We talk to you in your language, explain the jargon and find the best solutions, so you save time and make more money.
- ✓ **System Architecture** – We assess and modernise your infrastructure.
- ✓ **Migration** – Move any workload – application, website, database, storage, physical or virtual server, or an entire data center – to AWS.
- ✓ **Ongoing Support** – Experts in optimising, securing and monitoring your infrastructure.

## Migration Specialists

**Moving to the cloud can seem overwhelming. Where do you start? How do you make it seamless?**

Make Fitzroy IT your trusted partner for your migration and we'll guide you through the entire process.

We have the experience and expertise to move your workloads to AWS, so that you can reach your business goals quickly and with confidence.

## Case Study

Based in regional Victoria, WCL Management Services (WCLMS) is a rapidly growing company that has established itself as the go-to provider of bus replacement management software for both planned and emergency passenger transportation events for large organisations including Metro, V/Line and TfNSW.

The popularity of WCLMS' software solutions had put strains on its legacy infrastructure. There was a requirement to migrate from onsite servers to cloud infrastructure that was elastic and had the flexibility to scale significantly in order to meet the demand.

The Fitzroy IT team has partnered with WCLMS to migrate their infrastructure to AWS; providing consulting, infrastructure support, product design, web and app development. Now that WCLMS is a true AWS convert, Fitzroy IT will be employed to proactively manage and improve WCLMS' environment, and ultimately increase their AWS spend as they continue to grow.
